MHE130011 – Bihar Mid-Century Vase

Accessories

The clean lines and straight forward simplistic design of the mid-century movement inspired us to create accessories in that style for today's busy lifestyles. After searching for the right material, we finally settled on a rich green slate that is from the region of Bihar in northern India near the border with Nepal. The simple designs took on a new life with this stunning stone, especially after the craftsmen expertly cut and polished each piece by hand. This Bihar Mid-Century Vase is small in stature but huge in style with all of the incredible texture and depth of green slate within it.

Specifications
